

CAHU December 2009 Newsletter

Legislative Update

Members of NAHU and CAHU have the benefit of a variety of legislative services: active, high-level lobbying, up-to-date legislative information, issue tracking and alerts, and expert analysis. In addition, a variety of opportunities for grassroots involvement are offered.

Simply click on <http://www.nahu.org/legislative/index.cfm> to get started. You'll find a wealth of information at your fingertips, including: topical discussions of issues impacting our industry, summaries and analysis of relevant bills under consideration, identification of key Congressional members and their respective positions pertaining to these issues, and contact information for these members.

In terms of lobbying and grassroots involvement, NAHU has taken the effort out of communicating with your legislators by offering their up-to-date contact information for your convenience. In addition, they offer two easy methods for involvement - Operation Shouts and Code Blues. Both of these are email Action Alerts, tailored to your respective congressmen, on any given topic. Operation Shouts are state-level email campaigns and Code Blues are more national in nature.

All that's required of you is to make a couple clicks and a tailored message is instantly sent to your respective congressmen. Simply review the form letter, edit or customize if you wish, input your zip, and click send. The system routes the message to the appropriate legislator. It's that simple!

Click on <http://capwiz.com/nahu/issues/alert/?alertid=14439856> for a sample of an Action Alert.

Grassroots involvement in any issue is vital to our responsibilities as citizens. We are blessed to live in a country where our voices truly count in shaping policy and making important government decisions. NAHU has channeled their industry knowledge and legislative expertise into a variety of easy-to-use grassroots tools available for your use.
